LTI Intake Form

INSTRUCTIONS: *To initiate a request for consideration of a new Brightspace LTI, please provide required information for review by your school / department's Domain Admin. Your unit's Domain Admin will submit your completed request form for consideration by the Brightspace Governance Committee. All LTI requests should be submitted a semester in advance of when the tool will be needed in Brightspace (i.e. if required at the beginning of the Spring semester, please submit your request no later than the beginning of the preceding Fall semester).*

* = *Required Field*

Requester Info

Full Name*

Duke Bristow

USC School*

Marshall School of Business

Department*

Finance and Business Economics (FBE)

Email*

dbristow @usc.edu

Alternate email

dbristow@marshall.usc.edu

Phone*

213-740-6513

Alternate phone

213-821-6513

LTI Info

LTI Name*

LOCKqz

Vendor Company Name*

LOCKqz (independent developer Anthony Hall, USC student)

Vendor Website URL*

https://lockdownqz.pages.dev

Short Description*

LOCKqz blocks AI tools (ChatGPT, Claude, Gemini, Copilot, Perplexity and similar) on a student's own Mac or Windows computer only while a designated Brightspace quiz is open, then restores them when the quiz is submitted. Notes, files and the rest of the web stay available, so open-note quizzes stay open-note but AI-free. It is not a proctoring tool: no camera, microphone, screen capture or keystroke logging.

LTI Functionality*

LTI 1.3 Advantage: (1) LTI launch, so an instructor opens the LOCKqz dashboard from Brightspace with single sign-on; (2) Names and Roles Provisioning Service, so an instructor sees which of their enrolled students have installed LOCKqz; (3) optional Valence API access scoped to quizzing, to set a quiz's access password automatically. No grade passback. No access to quiz content, answers or grades.

Justification/Need for LTI*

Instructors need open-note quizzes without AI. The deployed Respondus LockDown Browser blocks all other apps, files and websites, so it cannot run open-note; no deployed LTI blocks only AI.

Expected Usage (i.e. # of users, classes, and/or departments per year)*

Pilot: one FBE course (Professor Bristow), starting Fall 2026; other Marshall courses only after a successful pilot.

Semester Needed*

Fall 2026

Describe the LTI Pricing Model*

No cost to USC or students for the pilot. Long-term pricing has not been set.

Any additional information to share?

Requested as soon as possible (Fall 2026). No AI features (it blocks AI). Security answers, VPAT 2.5 and HECVAT 4 attached; no SOC 2 yet (hosted on Cloudflare, which holds SOC 2 Type II).
