LOCKqz Accessibility Conformance Report

WCAG Edition

(Based on VPAT® Version 2.5Rev)

Name of Product/Version: LOCKqz 0.2.0

Report Date: October 2026

Product Description: LOCKqz blocks AI tools on a student's own Mac or Windows computer only while a designated Brightspace quiz is open, then restores them when the quiz is submitted. Students use a one-page download site and a few operating-system dialogs; instructors use a web dashboard to create quiz passwords and see which students were locked.

Contact Information: Anthony Hall, athall@usc.edu, 858-900-4347

Notes: Scope: the LOCKqz website at https://lockqz.pages.dev (download page and privacy page) and https://prof.lockqz.pages.dev (instructor dashboard, including its signed-in views) and the student helper's on-screen prompts on macOS and Windows. The background helper has no user interface. The planned Brightspace LTI 1.3 launch views are not yet built and are not covered; this report will be updated when they are. VPAT 2.5Rev is the current ITI template and supersedes VPAT 2.4.

Evaluation Methods Used: Evaluated on 22 October 2026 by the developer, who knows the product but is not an accessibility specialist. Automated testing used axe-core 4.10.2 with the WCAG 2.0 and 2.1 Level A and AA rule sets in Chromium 153 (Playwright) against the live pages, including the signed-in dashboard rendered with test data. Manual checks covered keyboard-only operation and focus order, reflow at 320 CSS pixels, the WCAG text-spacing override, contrast calculations, and a source-code review. The student prompts are standard operating-system dialogs (macOS AppleScript dialogs; Windows Forms message and input boxes), which expose their text and buttons to VoiceOver and Narrator; they were reviewed in code and were not tested with a screen reader.

"Voluntary Product Accessibility Template" and "VPAT" are registered service marks of the Information Technology Industry Council (ITI)

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standard/guidelines:

Standard/Guideline	Included In Report
Web Content Accessibility Guidelines 2.0	Level A (Yes) Level AA (Yes) Level AAA (No)
Web Content Accessibility Guidelines 2.1	Level A (Yes) Level AA (Yes) Level AAA (No)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports**: The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports**: Some functionality of the product does not meet the criterion.
- **Does Not Support**: The majority of product functionality does not meet the criterion.
- **Not Applicable**: The criterion is not relevant to the product.
- **Not Evaluated**: The product has not been evaluated against the criterion. This can only be used in WCAG Level AAA criteria.

WCAG 2.x Report

Note: When reporting on conformance with the WCAG 2.x Success Criteria, they are scoped for full pages, complete processes, and accessibility-supported ways of using technology as documented in the WCAG 2.0 Conformance Requirements.

Table 1: Success Criteria, Level A

Level A: no additional notes.

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Supports	No informative images. Status icons in the live monitor are emoji always paired with a text label (for example "Locked", "TAMPER"). Student prompts are text-only system dialogs.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Not Applicable	The product contains no audio or video.
1.2.2 Captions (Prerecorded) (Level A)	Not Applicable	The product contains no audio or video.
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Not Applicable	The product contains no audio or video.
1.3.1 Info and Relationships (Level A)	Partially Supports	Data tables use header cells and dashboard sections use headings. Text fields on the dashboard have no programmatic label element (placeholder text only), and the dashboard and privacy page use a styled banner rather than a level-1 heading.
1.3.2 Meaningful Sequence (Level A)	Supports	Reading and focus order match the visual order.
1.3.3 Sensory Characteristics (Level A)	Supports	Instructions do not rely on shape, size, visual location or sound.
1.4.1 Use of Color (Level A)	Supports	Live-monitor row colours are always paired with an emoji and a text status label.
1.4.2 Audio Control (Level A)	Not Applicable	The product plays no audio.
2.1.1 Keyboard (Level A)	Supports	All functions use native links and buttons; a keyboard-only test reached every dashboard control. Student prompts are operating-system dialogs operable with the keyboard.
2.1.2 No Keyboard Trap (Level A)	Supports	No keyboard traps were found.
2.1.4 Character Key Shortcuts (Level A 2.1 and 2.2)	Supports	The product has no single-character keyboard shortcuts.

Criteria	Conformance Level	Remarks and Explanations
2.2.1 Timing Adjustable (Level A)	Partially Supports	Web pages set no time limits. On macOS, the student's informational dialogs ("AI is locked for this quiz", which also shows the quiz password) close automatically after 180 seconds; the password stays on the clipboard. Quiz time limits are set in Brightspace, not by LOCKqz.
2.2.2 Pause, Stop, Hide (Level A)	Partially Supports	After an instructor selects Watch, the live monitor refreshes every 10 seconds and has no pause control other than leaving the page. There is no moving, blinking or scrolling content.
2.3.1 Three Flashes or Below Threshold (Level A)	Supports	No flashing content.
2.4.1 Bypass Blocks (Level A)	Supports	Pages have no repeated navigation blocks; content begins after a one-line banner.
2.4.2 Page Titled (Level A)	Supports	Each page has a descriptive title ("LOCKqz", "LOCKqz — Privacy", "LOCKqz — Teacher").
2.4.3 Focus Order (Level A)	Supports	Focus order follows the reading order (verified by tabbing through the dashboard).
2.4.4 Link Purpose (In Context) (Level A)	Supports	Link text describes each destination (for example "Privacy", "New here? Create an account").
2.5.1 Pointer Gestures (Level A 2.1 and 2.2)	Supports	No path-based or multipoint gestures are used.
2.5.2 Pointer Cancellation (Level A 2.1 and 2.2)	Supports	Actions run on the up-event of native controls.
2.5.3 Label in Name (Level A 2.1 and 2.2)	Supports	Visible button and link text matches the accessible name.
2.5.4 Motion Actuation (Level A 2.1 and 2.2)	Supports	No functions are operated by device motion.
3.1.1 Language of Page (Level A)	Supports	Every page declares lang="en".
3.2.1 On Focus (Level A)	Supports	Receiving focus never changes the context.
3.2.2 On Input (Level A)	Supports	Entering text does not change the context; forms submit only on a button press or Enter.
3.3.1 Error Identification (Level A)	Supports	Errors are described in text (for example "wrong email or password") or in a browser alert.
3.3.2 Labels or Instructions (Level A)	Partially Supports	Text fields show placeholder text as their only label; it disappears while the user types.

Criteria	Conformance Level	Remarks and Explanations
4.1.1 Parsing (Level A) WCAG 2.0 and 2.1 – Always answer 'Supports' WCAG 2.2 (obsolete and removed) - Does not apply	Supports	For WCAG 2.0 and 2.1, the September 2023 errata update indicates this criterion is always supported. See the WCAG 2.0 Editorial Errata and the WCAG 2.1 Editorial Errata.
4.1.2 Name, Role, Value (Level A)	Supports	Native HTML controls expose name, role and value; text fields take their accessible name from the placeholder (axe-core label rule passed).

Table 2: Success Criteria, Level AA

Level AA: no additional notes.

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Not Applicable	The product contains no live audio or video.
1.2.5 Audio Description (Prerecorded) (Level AA)	Not Applicable	The product contains no video.
1.3.4 Orientation (Level AA 2.1 and 2.2)	Supports	Content works in portrait and landscape orientation.
1.3.5 Identify Input Purpose (Level AA 2.1 and 2.2)	Does Not Support	The sign-up and log-in fields (name, email, password) do not carry autocomplete attributes.
1.4.3 Contrast (Minimum) (Level AA)	Partially Supports	Most text meets 4.5:1. Exceptions: the operating-system label and the "Privacy" link on the download page (#777 on #fafafa, about 4.3:1), and completed rows in the live monitor and inactive rows in the admin table (#888 on white, about 3.5:1).
1.4.4 Resize text (Level AA)	Supports	Text scales to 200 percent with browser zoom without loss of content or function.
1.4.5 Images of Text (Level AA)	Supports	No images of text.
1.4.10 Reflow (Level AA 2.1 and 2.2)	Supports	At 320 CSS pixels all content reflows except the dashboard's data tables, which scroll horizontally (an allowed exception for two-dimensional content).
1.4.11 Non-text Contrast (Level AA 2.1 and 2.2)	Partially Supports	Buttons, focus indicators and status icons meet 3:1. Text-field borders (#ccc on white, about 1.6:1) do not.

Criteria	Conformance Level	Remarks and Explanations
1.4.12 Text Spacing (Level AA 2.1 and 2.2)	Supports	No content was lost or clipped with the WCAG text-spacing override applied.
1.4.13 Content on Hover or Focus (Level AA 2.1 and 2.2)	Supports	No content appears on hover or focus.
2.4.5 Multiple Ways (Level AA)	Partially Supports	The site has three pages. The download page links to the privacy page; the instructor dashboard is reached by its direct address (and, once the LTI integration is live, from Brightspace).
2.4.6 Headings and Labels (Level AA)	Partially Supports	Headings describe each dashboard section; text fields rely on placeholder text instead of visible labels.
2.4.7 Focus Visible (Level AA)	Supports	The browser's default focus outline is kept on all controls.
3.1.2 Language of Parts (Level AA)	Supports	All content is in English.
3.2.3 Consistent Navigation (Level AA)	Supports	The banner appears in the same place on each page.
3.2.4 Consistent Identification (Level AA)	Supports	Controls with the same function have the same labels (for example "Watch" and "Remove").
3.3.3 Error Suggestion (Level AA)	Supports	Error messages suggest the fix (for example "password must be at least 8 characters"; "No quiz id found in that link. Paste the link from the quiz's own page").
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Supports	Removing a quiz or course, or turning off a teacher account, asks for confirmation. The product has no legal or financial transactions.
4.1.3 Status Messages (Level AA 2.1 and 2.2)	Does Not Support	Status messages (log-in errors, the new quiz password confirmation and live-monitor updates) are not exposed through ARIA live regions, so screen readers do not announce them automatically.

Legal Disclaimer (LOCKqz)

This report describes LOCKqz 0.2.0 as of October 2026. It is provided for information and is not a warranty. Findings may change as the product is updated.
