Security Questions for New LTIs

INSTRUCTIONS: *The ITS Security team needs the following information to complete the security review of all new LTIs. Some of the following questions can be answered with the information provided on the LTI Intake form; however, you will need to reach out to the vendor's customer success manager to fully complete this form. Once completed, this form should be added as an attachment to the Application Add-On SNOW form.*

General

What is the application of the tool?

What value does it bring to USC?

Third-Party Security Risk Management (TPSRM)

Has the vendor undergone TPSRM?

What type of data (if any) is being stored by the vendor?

When was the last external security assessment conducted (i.e. do they have a SOC certification or something similar)?

When was their last security incident or compromise?

Please describe it and any outcomes.

Technical

Is this platform cloud hosted or on-prem?

Do they leverage a public cloud provider?

How Is data shared with this application?

How is data protected during transmission and at rest?

How is authentication and authorization handled by the integration?
